RUBBER TIPPED ACTIVATION LEVERS FEATURE MOMENTARY AND LOCK-ON POSITIONS TO ASSIST WITH FILLING INDIVIDUAL CUPS OR LARGE JUGS

Energy efficient

Users can set the 7 day programmable timer to suit their schedules and save energy when drinks are not required. Timer programming is simple and intuitive. Additionally a sleep mode automatically powers the unit down when it's not in use.

Filter out the taste of chlorine

The Rheem on-tap series is fitted with a filter that removes chlorine, taste and odours for a perfect drink of water or cup of tea. Fine dirt and sediment particles are removed while an advanced phosphate compound reduces costly lime-scale build-up.

The filter is a standard feature of the Rheem on-tap series. The replaceable filter cartridge can be easily removed by a simple twist and pull of the bayonet fitting. The electronic programme advises when this is required to be replaced.

Perfectly chilled

Optional Rheem chillers are available for both the 3 litre and 6 litre models providing up to 175 glasses of chilled water per hour. Flexible, modular design ensures maximum use of under cupboard space. Optional Rheem chillers automatically mirror the timer and auto-shut off programming of the TB.

*Intelligent design
adds style and safety*

While under the counter the focus is all about performance and flexibility, above the counter the focus is style, safety and ease of use. The water dispenser for the Rheem on-tap series was designed in close consultation with architects and interior designers to look and feel beautiful, and be safe and simple to use.

"Breakthrough technology delivers filtered & boiling water from one system & reduces installation costs"

Filtered boiling and drinking water, on-tap

Rheem TB on-tap

The Rheem TB on-tap provides filtered boiling and chilled drinking water at the press of a button.

When you need filtered boiling water for tea or coffee and filtered drinking water for a refreshing drink, the Rheem TB on-tap is the ideal fit for any small to medium sized office. The under counter TB cabinet is compact in size, requires only a cold water connection and a standard power point.

All water is filtered and, if desired, chilled water can be provided with the addition of the modular Rheem chiller unit.

- 3 AND 5 LITRE TB MODELS, DELIVER UP TO 170 CUPS OF BOILING WATER PER HOUR
- FILTER PROVIDES CLEANER DRINKING WATER AND IS EASY TO CHANGE
- BUILT-IN SAFE TRAY ELIMINATES NEED FOR SEPARATE TRAY AND DRAINAGE, ADDING PEACE OF MIND AND REDUCING INSTALLATION COSTS
- 7 DAY PROGRAMMABLE TIMER AND SLEEP MODE SAVES MONEY AND ENERGY.
- OPTIONAL CHILLER UNIT IS MODULAR IN DESIGN TO MAXIMISE UNDER COUNTER SPACE

Accessories on-tap

Sink-free Kit

Want to locate the dispenser in the boardroom or break-out room? The Rheem sink-free kit eliminates the need for a sink, allowing bench top mounting. A perfect complement to the tap design, the Rheem sink-free kit includes a drainage grate and tap extension to clear tall jugs and bottles.

Discreet Ventilation Kit

Ventilation is essential when installing a chiller*. The only tell tale sign of the Rheem discreet ventilation kit is the stainless steel grill, low down on the kick plate. Instead of unsightly grills in cupboard doors, the Rheem fan, air intake and stainless steel exhaust grill are all housed discreetly at kick plate level. The fan draws power from the TB unit and saves energy by running only when required.

*Rheem Discreet Ventilation Kit is a mandatory requirement with the 6L chiller.

Boiling

A flexible solution for every application

The modular Rheem on-tap series provides a beautifully efficient solution, regardless of your needs and application. Boiling, chilled and filtered water combinations can be specified with the intelligent Rheem on-tap series.

And because it's from Rheem, you know it's backed by our nation-wide service and support network, as well as our reputation for quality and thoughtful design.

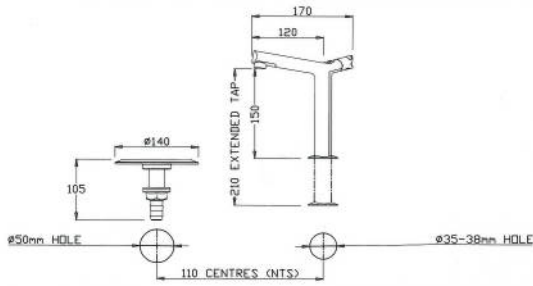

Designed in partnership with architects, interior designers and hydraulic engineers, the Rheem on-tap series provides clear cut advantages in the areas of aesthetics, usability, performance efficiency and installation. Beauty. And brains.
