

Bench Top Sparkling Water System

Add another dimension to your drinking water. Offering Chilled , Ambient, or Sparkling Water on demand as and when you need it - to tickle your fancy. Freshly filtered.

FEATURES

- The only model on the market with ice bank tank in stainless steel with extractable refrigeration coil and carbonator for easy maintenance and maximum hygiene. Refrigeration coils are fully sealed and external to the tank, avoiding the formation of biofilm or mould on the inside.
- Compact size: it can be mounted either over or under-counter, and can even be reinstalled the other way if the need arises.
- Operates in all New Zealand conditions up to 43°C.
- Water is re-circulated internally so that the unit can be placed at a good distance from the mains supply point to suit all your needs and wants.
- The advanced G plus units have introduced indicator lights to enable the user to easily check the functioning of the electrical and refrigeration circuits as well as the carbonator.
- Sealed refrigeration system to eliminate the inconveniences related to the refilling of the open ice bank systems.
