

Discover the convenience of never waiting for the kettle to boil or having to buy bottled water. Enjoy instant filtered steaming hot and chilled drinking water from the same stylish tap. Space saving, efficient, elegant...

## Steaming Hot/Chilled Billi Quadra 4100 XT

The functional style is designed for high use and meets green building design principles – providing you with the ultimate in environmentally sensitive appliances.

### XT Touch Dispenser

An innovative, contemporary tap, with no levers to interfere with the clean, sophisticated style. It has an operation panel on the top of the tap. Available in Bright Chrome, or Matte Black colour.

#### Energy Saving

##### Recovery, recycling & saving

Utilise the patented Billi Thermodynamic Heat Exchange breakthrough technology, in energy efficient appliance design. Uses change of state technology to allow a large amount of heat to be absorbed and stored. Typically this heat generated during the cooling process is wasted to the atmosphere. Billi recovers this waste heat energy to preheat the boiling water, enabling the systems to achieve substantial energy savings.

##### 7-day time switch

An inbuilt 24 hour, 7 day time switch which ensures the unit is running only when needed and eliminating unnecessary out-of-hours power consumption.

##### Stand-by mode

An energy saving standby mode that can be selected to activate after a pre-set time of non use, enabling partial power down to conserve power.

##### Eco-intelligence

New software technology that automatically allows the unit to only operate when required. Monitors daily usage patterns, even recognising evening and weekend changes, which means very effective minimisation of energy consumption.

#### Safety & User Functionality

##### Splash free technology

Billi's Splash Free™ boiling water delivery electronically varies the water flow, slowing momentarily to eliminate splashing as the water first enters the cup.

##### Safety first

All Billi dispensers are supplied standard with a safety switch.

##### Adjustable chilled temperature

A simple adjustable control knob allows the chilled water temperature to be raised to 15°C or lowered to 6°C for perfectly chilled, refreshing drinks, with your required temperature being quickly reached and maintained

#### Underbench Technology

##### Space saving unit size

With a focus on space saving, Billi systems are often less than half the size of comparative products, allowing you to make the most of the available area.

##### No cupboard ventilation required

The Billi Quadra watercooled units do not require cupboard ventilation or a cooling fan.

#### Modern Design

##### Stylish tap design

The result of much collaboration with architects, designers and consumers was a sophisticated, stylish tapware that perfectly complements the style of its surroundings.

## Specification

Product Code	Model	Initial cup delivery and suggested number of persons	Boiling water delivery cups per hour	Chilled water delivery cups per hour	Total current draw (amps)	Height (mm)	Width (mm)	Depth (mm)
904100TCH	Billi Quadra Boiling/Chilled 4100 XT with Chrome Tap Incl Everpure Commercial Grade 0.5 Micron Filter (OCS)	up to 100	250	175	15	340	315	465
904100TMB	Billi Quadra Boiling/Chilled 4100 XT with Matte Black Tap Incl Everpure Commercial Grade 0.5 Micron Filter (OCS)	up to 100	250	175	15	340	315	465

Based on the initial number of cups of boiling water immediately available, drawn at one cup every 10 seconds. Consideration may be needed for usage patterns and draw-off methods. 1 cup = 170ml.

## Warranty and Certifications

### Power supply

The Quadra 4100 model requires a 15 Amp AU/NZ power outlet. All models are supplied with a 1 metre flex cord and plug.

### Water supply

A single 15mm (1/2") stop-tap with a male thread should be installed in an easily accessible position. Water supply must be microbiologically safe to drink, with a minimum dynamic water pressure of 250kPa.

### Certifications

Every Billi drinking water appliance is manufactured under a certified quality control system. The Billi Eco & Quadra models have been tested and complies with all required standards including: Watermark License Number 21525; Certified to; AS3498 and AS/NZS4020; ISO 9001; AS1428 Accessibility Design Requirements; Section J6 of the BCA; Certificate Number QEC 11627.

### Warranty

All components of the Billi units are covered by a 24 month warranty. Filter cartridges are a consumable and are not covered by warranty, as water conditions and usage vary.

### Everpure OCS Filter

- Reduces health contaminants such as asbestos fibers and Cryptosporidium and Giardia cysts, chlorine taste and odour and other offensive contaminants, provides clear, fresh, premium quality ingredient water.
- Saves energy by reducing scale build-up.
- New and improved Micro-Pure II media with AgION™ antimicrobial protection inhibits any potential bacterial growth.
- Precoat submicron technology reduces dirt and particles as small as 0.5 micron in size
- Sanitary cartridge replacement is simple, quick and clean. Internal filter parts are never exposed to handling or contamination

### On-going Servicing

Part	Frequency
OCS Filter**	6-12 Monthly

\*\*Change cartridges when capacity is reached or when pressure falls below 10 psi (0.69bar). Service flow rate must not exceed 1.89 Lpm.

Always flush the filter cartridge at time of installation and cartridge change.

Rated Capacity: 5,678 Litres
