

Under Bench UV Filter System

This three-stage UV system is easily installed Under Bench and comes with a stylish tap to compliment your kitchen. It will ensure the destruction of 99% of bacteria and viruses, including E-coli and Giardia, delivering clean, pure, great tasting water.

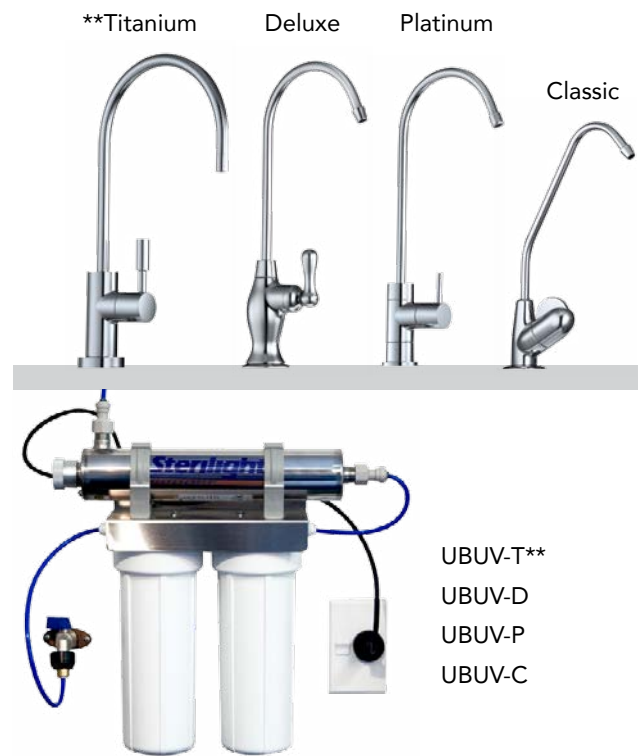

FEATURES

- Disinfection using Ultraviolet (UV) light is fast becoming the ecological choice in disinfection techniques. UV effectively destroys microbial contaminants without adding anything to the water. Unlike chlorine where there is the possibility of potentially harmful by-products created during its disinfection process, UV creates no residual by-products.
- Choose one of our stylish taps to compliment your kitchen
- System easily installed Under Bench (out of sight)
- Operates with one 90° turn
- Highly effective, economical
- 1st Stage includes 1 micron sediment pre-filter to reduce particles in the water
- 2nd Stage includes 0.5 micron carbon filter to reduce taste and odour of chlorine
- 3rd Stage ensures the destruction of 99% of bacteria and viruses, including E-coli and Giardia, delivering clean, safe, great-tasting water
- Cartridge Replacement/Service (Recommended every 12 months)
- Easy to maintain and service
- Built with a durable stainless steel chamber to prolong life and eliminate ultra violet light degradation
- Costs around 2 cents per litre

**Additional pricing applies to Titanium tap

BENEFITS OF PURE WATER

- Clean tasting and refreshing every time.
- Improves physical and mental performance.
- Needed for proper kidney function and healthy metabolism.
- Money saved from buying soft drinks, juice, teas and coffee.
