

Aqua iBoil Freestanding Inline Cooler

Stylish and contemporary appliance-like design. Its elevated height and dispensing area make it convenient and easy to fill large and small containers alike.

FEATURES

- Comes with lighted spout, hot and cold indicator lights, fast flow dispensing, safety lock function, Accu-Temp and Stay-Cool technologies.
- Front panel access allows installation of a water filter inside the cooler. The filtration unit comes equipped with our dependable, dual mechanical float and integrated lid.
- Integrated cup dispenser.
- Compressor uses R134a refrigerant. Cold water reservoir is manufactured from stainless steel.
- Cold water temperature is preset at 7.2°C range. Adjustments can be made on rear of cooler (slotted screw) Turn clockwise for colder; counterclockwise for warmer (¼ turn at a time)
- Hot water tank is 1.2 liter stainless steel with a 520 watt heat band. Temperature is controlled by non-adjustable thermostat/ high limit switch. Normal hot water temperature is 85°C +/- 10%.
- i-Boil feature (almost boiling) water will dispense at a temperature of approximately 93°C.

iBoil - Increases the hot water temperature in the hot tank temporarily to "almost" boiling when customers need "hotter" hot water for coffee and tea brewing, soups, noodles etc.

Accu-Temp - Proprietary dispensing system serves drinking water at the proper temperature every time.

Stay-Cool - Keeps the residual water in the cold waterway chilled and ready to serve at all times. Cold water pump turns on for 5 seconds every 30 minutes. Also suppress algae growth.

Enhanced Sanitization with "SIP-Inside" - Integrates the SIP sanitation system inside the MTN water cooler and sanitizes the cold reservoir, waterways and faucets. The entire waterway system can be cleaned and refreshed daily.

The Aqua i-Boil Water Cooler technology has been designed to meet the Energy Star requirements.
